

Thank you for your interest in joining SSA+S's TSA club. This club will be affiliated with both the national and the state associations which require dues of \$9 and \$10 respectively. This year the club will be limited to 15 members. Membership will be determined through an application process.

Once a member of the club, you will need to attend meetings after school to work on your skills in order to prepare for our State Competition. We will determine the schedule once the team has been assembled we will create a schedule that interferes with other clubs as little as possible.

As previously stated there is a state competition. This will involve costs for transportation, hotel, and food. We will also need a couple parents willing to volunteer to assist with being chaperones and to provide transportation to and from the event.

Examples of Technology activities will include:

- Communications
- Video / Film
- Photography
- Dragsters
- Structural Engineering
- Flight
- Green Technologies
- Invention and Innovation
- Problem Solving
- Multimedia / Animation
- Video Game Design
- Website Design
- Leadership Strategies
- And much more
